

Tamiflu Media Briefing

Summary

- WHO and other 3rd Parties confirm that the pandemic risk is still imminent and preparation is urgent
- Society has moved a long way but we still have to go a long way to be prepared for a pandemic- wide variation between countries
- Many governments and corporations have pandemic plans in place which include stockpiling antivirals- but coverage may not be enough
- Worldwide Tamiflu manufacturing capacity now exceeds demand- output will be adjusted accordingly
- Roche continue to deepen our understanding of the optimal use of Tamiflu in the emerging pandemic threat
