Roche PVT

*Competence center for intelligent laboratory workflow*

Roche PVT is the internationally leading supplier of innovative automation solutions for the clinical laboratory. With more than 1000 installations in 50 countries worldwide, health professionals benefit from simplified laboratory workflow applications for improved patient care in daily clinical practice.

As a pioneer in laboratory process automation Roche PVT aims at driving lab solution business to lighten the routine workload, simplify laboratory procedures and enhance overall staff safety. Higher productivity, improved sample throughput and result quality boost a laboratory’s overall efficiency at lowered costs.

Located in Waiblingen near Stuttgart/Germany – at the heart of Europe’s leading industry cluster for engineering – and acquired by Roche in 2011, the laboratory automation powerhouse is recognized as one of Germany’s most innovative medium sized businesses. Together with Roche in Mannheim, Penzberg and Rotkreuz, Roche PVT is an integral part of the Group’s innovation resource.

Roche PVT’s core competencies include electronics and mechanical engineering as well as software development. With the customer at the center, its success is grounded in the ability to anticipate and meet the ever evolving needs of laboratories around the globe.
